

Donkey Dribble

Organization:

All of the players with the exception of two, are donkeys and are given a tail by placing the end of pinnie in the back waistband of their shorts. The other two are hunters who are looking for donkey tails.

The donkeys run around the grid dribbling their soccer balls trying to avoid having their tails being caught by the hunters. Allow donkeys to re attach their tail when caught during the first minute and then during the "Knock Out" stage if they lose a tail they have to come and stand by the coach until all of the tails are caught.

Coach Notes:

The players should be encouraged to change direction while dribbling to avoid the hunters' grasp.
